

# DATASOURCE + SNOWFLAKE

**MAKE THE MOST OF YOUR DATA WITH A SNOWFLAKE  
CLOUD DATA WAREHOUSE AND DATASOURCE'S  
IMPLEMENTATION EXPERTISE.**

## SNOWFLAKE DIFFERENTIATORS:

### **Data Sharehouse**

Governed and secure, modern data sharing in real time. Within minutes, and without ever having to move data, share any slice of your data across your organization or with any of your business partners and customers. With Snowflake Data Sharing, you can easily forge one-to-one, one-to-many, and many-to-many data sharing relationships.

### **Multi-Cluster Architecture**

Snowflake's patented multi-cluster, shared data architecture separates storage and compute, making it possible to scale up or down without downtime or disruption.

### **Zero Management**

Snowflake is a true data warehouse-as-a-service running in the cloud, which eliminates the need to manage infrastructure. Snowflake automatically handles infrastructure, optimization, availability, data protection and more so you can focus on using your data, not managing it.

### **Diverse Data**

Snowflake's patented technology natively loads and optimizes both structured and semi-structured data such as JSON, Avro, or XML and makes it available via SQL without sacrificing performance or flexibility.
